Education

- **University of Tübingen** — Tübingen, Germany
  MSc in Machine Learning — Oct 2022 – Sep 2024
  Relevant Coursework : Deep Learning, Self-driving Cars
- **Manipal Institute of Technology** — Manipal, India
  B.Tech in Electrical and Electronics Engineering — Aug 2016 – Aug 2020
  Relevant Coursework: Data Structures, Image Processing, Probability and Statistics
  Thesis: Singapore Management University

Work Experience

- **Computer Vision Researcher, Zürich University of Applied Sciences** — May 2021 - August 2022
  Zürich, Switzerland
  - Working in the **Center of Artificial Intelligence** under the supervision of **Dr. Thilo Stadelmann**.
  - Created a **Connected-Components-enabled Semantic Segmentation** network to tackle noisy labels for **Food Waste Analysis**. Achieved state-of-the-art with a mean IoU score of **0.5219**.
  - Responsible for designing a novel adversarial learning system utilising discriminator-learned features for **Unsupervised Domain Adaptation** for Optical Music Recognition on the DeepScores dataset (synthetic) to real data, improving baseline results by **36%**.
- **Research Assistant, Singapore Management University** — Jan 2020 - Nov 2020, Sep 2021-Present(remote)
  Singapore
  - Worked under the supervision of **Dr. Wen-Yan Lin** on the project - **Robust Re-Identification and Object Tracking for Surveillance Systems**.
  - Theorised and spearheaded a new Triplet Mining approach based on pixel-level **Image Feature Matching and Correspondence** models, termed as **Relation Preserving Triplet Mining (RPTM)**.
  - Achieved state-of-the-art results on multiple public benchmarks and produced the first transferable and scalable algorithm for generalised re-identification tasks.

Internships

- **Research Associate, Jadavpur University** — Jun 2018 - Dec 2019
  Kolkata, India
  - Worked under the supervision of **Dr. Kamal Sarkar** on **Irony Detection and Classification** in Bengali Tweets, funded by the Science and Engineering Research Board, Government of India.
  - Created the first published dataset for irony detection and classification in Bengali, devising a computational linguistic foundation for 3 classes of irony.
  - Achieved baseline State of the Art results (**67.47% accuracy for binary classification and 48.31% for multi-label classification**) for the dataset, using word embedding models and TFIDF Vectorisation.
- **Research Student, Manipal Institute of Technology** — Oct 2018 - Mar 2019
  Manipal, India
  - Worked under the supervision of Associate Professor, Dr. Chandrika BK on the project - **Just Noticeable Differences in Low Quality Video Samples**.
  - Applied Butterworth Filters to measure the Contrast Sensitivity Function of CCTV image frames, followed by Gaussian Smoothing for Video enhancement.

Publications [Google Scholar]

1. Adhiraj Ghosh, Kuruparan Shanmugalingam and Wen-Yan Lin, **Relation Preserving Triplet Mining for Stabilising the Triplet Loss in Re-identification Systems** *WACV 2023* [paper] [code]
2. Adhiraj Ghosh and Kamal Sarkar, **Irony Detection in Bengali Tweets: A New Dataset, Experimentation and Results**, *International Conference on Computational Intelligence in Data Science, 2020* [paper] [code]
3. Lukas Tuggener, Raphael Emberger, **Adhiraj Ghosh**, Pascal Sager *et al.* **Real World Music Object Recognition**, Submitted to *Transactions of the International Society for Music Information Retrieval*

Technical Skills

- **Topics of Interest** Computer Vision, Deep Learning, Vision and Language
- **Languages** Python, MATLAB, Java
- **Tools/Frameworks** Docker/Singularity, PyTorch, Tensorflow, OpenCV, Gym, ParaView, wandb, VisualSFM, LabelImg

Relevant Projects

- **Motion Generation with Textual Descriptions** Sep 2022 - Present
  Guide : Dr. Arjun Chandrashekaran MPI-IS
  Supervisor : Dr. Michael Black
  - The goal of this project is, given text prompts, to generate discrete and symbolic motions by equating the text-to-human-centric information transformation as an autoregressive machine translation problem.
- **Face Mask Detection on Human Face Datasets** [Code] Feb 2020
  Guide : Dr. Wen-Yan Lin Sinagpore Management University
  - Worked on creating a simple and effective Histogram of Oriented Gradients(HOG) image descriptor and a Linear Support Vector Machine (SVM) to train an object detection network.
- **Robust Instance Segmentation using Mask RCNN** [Code] Jun 2020 -Jul 2020
  Guide : Dr. Wen-Yan Lin Sinagpore Management University
  - Establishing a segmentation mask on large image data with multiple objects in one image.
  - Using instance segmentation trained on MS COCO Dataset to isolate the detected objects based on the bounding box coordinates and the segmentation mask.

Academic Highlights and Responsibilities

Highlights

- Oral Presentation, WACV 2023: **Relation Preserving Triplet Mining for Stabilising the Triplet Loss in Re-identification Systems**
- Bachelor Thesis: **Towards the Analysis and Robust Representation of High Dimensional Data**, 2020.
- Best Undergraduate Seminar Presentation: **Implementation of Deep Learning in Medical Imaging and the Detection, Classification and Segmentation of Diseases**, 2019
- One of four students(selection rate 1.6 %) in Electrical and Electronics selected to be part of a Cisco India-Manipal University Software Development Project, 2019.

Responsibilities

- **Reviewer**: CVPR 2023, ECCV 2022
